Eyeliners

# Instructions:

## Skin care:

1. If you got the Self-tan mouse: Follow instructions and keep it on for 1 hr
2. Put on toner → any serums you got → eye cream → moisturiser (if you got the bronzing drops, mix a couple drops with the moisturiser before applying to the face → primer (none of these are must-haves)

Foundation I don't always apply. Its not aalways a must - depends on what you like and how your skin is doing.

For the concealer, Bronzer & blush, applying is the same: Put a bit of product on a plastic plate, dip it in, and tap multiple times on the clean area of the plate to get the product evenly around the brush. Apply the product in the right area, don't hesitate to squeeze/make the brush smaller if you feel the brush is too big.

# Instructions:

Dip the brush in the red color and apply it right BELOW your water line → Do the same with the brown color

Tip: You can add some brown on the top of the eye behind the lashes for more volume

# Brows

Fill brows if needed

# Eyeliner

## Eyeliner step by step

For anyone having a hard time with the eyeliner, try using tape to help you out

# Finish up with the lashes!

Curl your lashes

take off the brush and back into the bottle as much as product as possible, and then apply the mascara giving you a natural look.
